PROJECT OVERVIEW STATEMENT	Project name **Global Cast Agency**	Project No.	Project Manager **Aziz ÇETİN**

Problem/Opportunity

   People who want to be a model apply to many cast agencies. They pay a separate fee for these applications. A cast agency also pays compensation to request a model from another cast agency.

Goal

  Implement a common website platform to bring together all models and cast agencies.

Objectives

1. Implement an interface to share model's information and apply page to be a model.
2. Create an admin panel for website management, application approval.
3. Implement an interface to apply for cast agencies.
4. Create different permissions for different types of users (for ex.: visitor, model, agency).

Success Criteria

1. The payments of models will be reduced %10
2. Minimum 90% of models will be collected on this page.
3. All information of models and agencies will be secured.
4. A secure connection will be provided between models and cast agencies.

Assumptions, Risks, Obstacles

1. Fake model or agency application has to be handled carefully to protect the system's reputation.
2. The pairing of model and agency will be efficient.
3. Management will be supportive and persistent.
4. Principles of data protection and security will be shaped according to General Data Protection Regulation.
